Massanutten Resort & Indoor WaterPark

A breathtaking escape, Massanutten Resort features 1000 acres of mountain fun at its very best. Unlike its alps, rocky terrain, and endless trails and trail accommodations, Massanutten has created its own in the form of the indoor waterpark. Located in the heart of the Shenandoah Valley and only 45 minutes from Charlottesville, Massanutten is easy to reach.

Recently named one of the Top 10 Best Indoor Waterparks in America by Reader's Digest, Massanutten WaterPark is home to eight exciting tube and body slides, the Adventure Race, kiddie area, and even indoor surfing! The Park also features three restaurants, a huge movie area, soft play, and an outdoor playground that is open during the summer months. Massanutten WaterPark is just what you need for a fun-filled vacation.

Simply known as the place where families learn how to ski together, Massanutten Resort has been offering a more sports experience unlike most other resorts for over 40 years. This experience cannot wait! Enjoy just what you need for a fun-filled vacation.

Guidelines

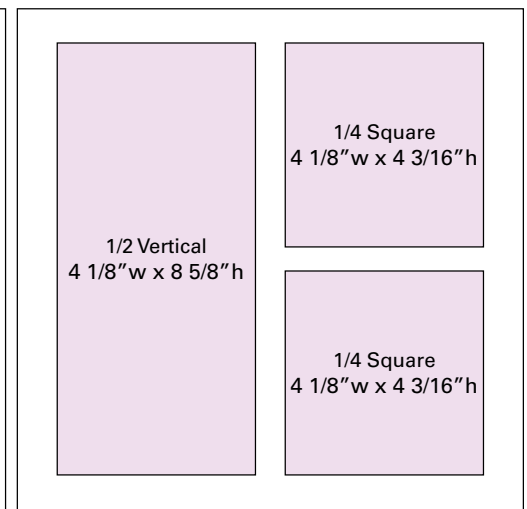

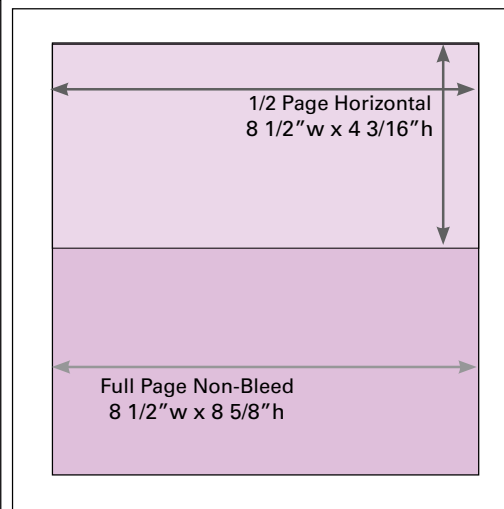

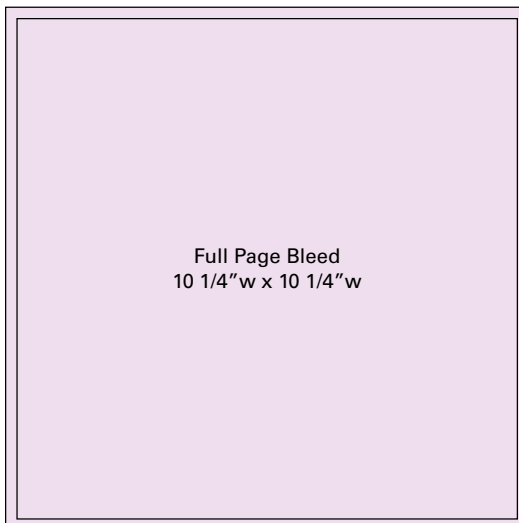

- Save all art as high resolution (300 dpi) and four-color process CMYK only. (Spot colors should be converted to process.)
- Fonts: Use ONLY PostScript Type 1 or OpenType. Outline ALL fonts.
- All ads must conform to dimensions above. Do not use any marks or bleeds. If ads do not conform, the ad will be modified to fit the appropriate space at the advertiser's expense.
- Apply rich black (C=40 M=30 Y=30 K=100) to large areas of black

* Bleed is a printing term that refers to printing that goes beyond the edge of the sheet after trimming. It is very difficult to print exactly to the edge of a sheet of paper, so to achieve this it is necessary to print a slightly larger area than is needed and then trim the paper down to the required finished size. Images, background images and fills which are intended to extend to the edge of the page must be extended beyond the trim line to give a bleed.

The final size of a printed page after excess edges have been cut off is the trim size.

The live area is a safe zone for important text or images. This is an area of your printed piece that is safe from cropping. Keep text and important graphics inside the live area. For two page spreads and full page ads with bleed use 5/8" on left and right sides for spine safety margin.

Technical Information

Mechanical Requirements

- The *Discover Charlottesville* Book is produced with accepted standards for web offset printing (SWOP), using four-color process inks (CMYK).
- Final digital ads should be supplied as PDF/x1-a or Press Quality PDFs with high-resolution transparency flattening. **NO PRINTER'S MARKS: including crop marks, bleed marks, registration marks, color bars or page information.** Include all fonts subsetted at 100%.

These files must be created using one or more of the following software programs only: Adobe InDesign, PhotoShop or Illustrator. Please do not use Microsoft Publisher or Office applications as these do not create acceptable PDFs.

Build your ads to conform to these specifications at final size.

- Image (photo) files should be 300 pixels per inch in CMYK. One-bit images (such as black and white logos) should be a minimum 600 pixels per inch.
- Convert all colors to 4/C process colors (CMYK). No Pantone, RGB or Lab Color. If not CMYK, publisher will convert color as needed and will not be held responsible for any color shift.
- Check that the maximum total ink cover (TAC) does not exceed 300%.
- Provide 1/4" bleeds (image beyond trim) in bleed ads.
- Keep all live matter 1/4" from the trim on all four sides.
- For two page spreads and full page ads with bleed use 5/8" on left and right sides for spine safety margin.
- All ads must conform to the specification sheet dimensions. If they do not, the ad will be modified to fit the appropriate space at the advertiser's expense.
- Files must be in .zip format if compression software is used.
- Ad Proofs: We follow industry standards on press. If running a color ad, you may supply a color proof which will be used to check content not for color matching. Please note that consumer printers cannot be relied upon to predict press color as the inks used are not true press colors.

General Information

City Select is not responsible for, nor does it guarantee the accuracy or reproduction quality of materials which do not meet these specifications. Changes to supplied materials will be made by publisher only on written instructions from client, and such changes must be received at least 30 days prior to print date. City Select can accept native files in a limited number of formats (please call for formats). Changes can only be made if the native files, fonts and graphics are supplied. City Select endeavors to comply with all advertiser's changes, however, City Select assumes no responsibility for errors and omissions resulting from such changes.

Design Fees

Display Ads

Materials Provided by Advertiser:

If advertiser provides advertising that fits ad dimensions there will be no design fee.

If advertiser wishes us to recreate an ad from some of their previous works to fit our ad specifications, design fees may apply. Original native files are helpful (Adobe Design Suite preferred). Needed design elements include high resolution images, fonts, logos, text and a pdf copy of the original ad.

Original Ad Creation:

If advertiser does not have an example ad that we can reconfigure to our specifications or wishes to create a brand new look, an estimated design fee will be provided for original ad creation, photography and writing. When original ads are created, complete native files will be given to client in addition to copyright privileges for other publications.

Formatted Ads

No design fee.
